**Subject:** Fw: Draft Biological Opinion - Chlorpyrifos, Diazinon, and Malathion: NMFS Preliminary Draft Effects Analysis and Preliminary Species Conclusions

Let's talk tomorrow - maybe after our ESA check-in meeting on the level of effort to expend on providing comments. Can you provide the sharepoint link?

Also, from today's general w Rick, there are some follow-up items in response to the "letter" we'll need to prepare.

I'll try to find time on your calendar to chat.

Thanks,

Anita

Dear all -

I asked my staff to get this info to you because I am in an all day meeting. Please be aware that our attorneys and I will be reviewing this material at the same time you are.

If you need a conference call to go over what is being sent to you we can do that. We ask that whatever comments EPA and USDA have on the documents we get those 3 weeks from today. I think that is May 15 unless I am mistaken.

We should talk about the form of those comments. I am not sure if FWS is going to comment as well so let's talk about that.

Thank you for all your hard work on this in advance.

Cathy

Ryan Dewitt has uploaded a preliminary draft of NMFS' Effects Analysis for the species and preliminary Species Conclusions to EPA's Sharepoint. For those at FWS and USDA, you will receive a separate email invite that will allow you to access the document via your google drive.

If for some reason you cannot access this file please let us know and we will find another way to get it to you.
